EXTRA CENSUS BULLETIN.

No. 12.

WASHINGTON, D. C.

October 26, 1891.

STATISTICS OF FARMS, HOMES, AND MORTGAGES.

ILLINOIS.

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,

WASHINGTON, D. C., October 20, 1891.

SIR:

The results of the investigation relating to farms, homes, and mortgages in Illinois are given in the present bulletin. The tables showing the number and amount of real estate mortgages made during the decade 1880-1889, the number of acres and lots covered by mortgages, the total recorded real estate mortgage debt in force January 1, 1890, the specified rates of interest, and the objects of indebtedness as determined by personal inquiry, together with an exhaustive introductory concerning the mortgages of the state, were prepared by Mr. GEORGE K. HOLMES and Mr. JOHN S. LORD, special agents in charge of this branch of investigation by the Census Office.

The most important derived results of the investigation show that 30.78 per cent of the number of taxed acres in the state and 26.14 per cent of the number of taxed lots, including all improvements, were mortgaged January 1, 1890.

The per capita debt in force January 1, 1890, for the state was \$100. In Cook county, including Chicago, it was \$161, and for the state, exclusive of Cook county, it was \$73.

The total amount of real estate mortgages made during the years 1880 and 1889 in the state was as follows:

ACRES AND LOTS.	1880.	1889.
Total.....	\$13,276,929	\$137,762,456
On acres.....	29,856,857	40,804,799
On lots.....	23,420,092	96,957,657

The total amount of real estate mortgages in existence January 1, 1890, in the state was—

On acres.....	\$165,289,112
On lots.....	219,010,038
Total.....	384,299,150

The total number of taxed acres and lots in the state compared with the number of acres and lots mortgaged January 1, 1890, is given herewith:

NUMBER.	Acres.	Lots.
Total number taxed.....	34,640,560	1,094,737
Number mortgaged.....	10,600,987	286,148

The average value of each assessed acre in the state with the average amount mortgaged is as follows:

Average value of each assessed acre.....	\$35.95
Average amount of mortgage.....	15.50

For the decade, as shown by the tables, the following summary will be of interest:

Number of mortgages made during the decade, stating debt.....	612,249
Number of mortgages made during the decade, not stating debt	4,235
Number of acres mortgaged during the decade	21,578,919
Number of lots mortgaged during the decade	602,152
Total debt recorded on acres during the decade	\$356,809,731
Total debt recorded on lots during the decade	513,890,209
Total recorded debt during the decade	870,699,940

The total number of mortgages in force January 1, 1890, was as follows:

On acres.....	128,986
On lots.....	168,261
Total on acres and lots.....	297,247

The city of Chicago, the second city of the Union, being embraced within the limits of Cook county, interesting comparisons are made in the bulletin of the existing indebtedness throughout the state, including and excluding the county. Summarized, the comparison of the amount of real estate mortgages made during the years 1880 and 1889 in Cook county with the state, exclusive of the county, is as follows:

DIVISION OF STATE.	1880.			1889.		
	Total.	On acres.	On lots.	Total.	On acres.	On lots.
The state, exclusive of Cook county.....	\$35,693,702	\$28,656,414	\$7,037,288	\$51,039,091	\$34,752,601	\$16,286,490
Cook county.....	17,583,227	1,226,423	16,362,804	86,723,365	6,052,198	80,671,167

The percentage of mortgage indebtedness in force in the state on January 1, 1890, was 43.01 on acres and 56.99 on lots. In Cook county the percentage as against the whole state was 8.51 on acres and 81.03 on lots, and 49.84 of the total indebtedness of the state.

Very respectfully,

ROBERT P. PORTER,
Superintendent of Census.

THE SECRETARY OF THE INTERIOR.

STATISTICS OF FARMS, HOMES, AND MORTGAGES.

ILLINOIS.

BY GEORGE K. HOLMES AND JOHN S. LORD.

MORTGAGES RECORDED DURING THE 10 YEARS, 1880-1889.

Illinois, the third state of the Union in population, and an important one in the magnitude of its agricultural and mineral products, of its manufactures, trade, and means of transportation, supplies interesting and instructive statistics of real estate mortgage indebtedness. The situation of Chicago, the second city of the Union, in this state increases the interest, because it is desired to know to what extent mortgage indebtedness is associated with the rapid growth of population and the great industrial development of a large city.

THE AMOUNTS OF MORTGAGES.

Attention is called first to Table 1, which exhibits the number and amount of real estate mortgages made during each one of the 10 years, 1880-1889, and the number of acres outside of villages and cities and of lots within that have been incumbered. During this whole period 612,249 mortgages stating amount of debt were made in the state to secure a debt of \$870,699,940, but a large portion of these mortgages have been fully paid. The increase in amount of debt incurred was generally constant from year to year. The decade began with \$53,276,929, incurred in 1880, and ended with \$137,762,456 in 1889, the largest annual gain being from \$102,507,281, in 1888, to the amount incurred in 1889, or 34.39 per cent, and the gain in the 10 years was 158.58 per cent.

This increase in the amount of debt incurred annually is chiefly due to the increase of debt placed on village and city lots. The amount incurred on lots in 1880 was \$23,420,092, and, except a slight falling off from 1882 to 1883, the annual increase was unbroken to \$96,957,657 in 1889, making an increase of 313.99 per cent in 10 years, the greatest annual increase being from 1888 to 1889, or 39.32 per cent. The amount of debt incurred on acre tracts, which include farms, was \$29,856,837 in 1880, \$35,683,412 in 1881, and \$38,624,291 in 1882. This amount was not equaled until \$10,804,799 was incurred in 1889, and in the meantime the smallest amount was \$32,915,760, in 1888. The greatest annual increase was from 1888 to 1889, or 23.97 per cent. In 1880 the debt incurred on lots was 78.44 per cent of the debt incurred on acres, but the debt incurred on lots became larger than that incurred on acres in 1882 and increased its preponderance to 1889, when the amount incurred on lots was 237.61 per cent of the amount incurred on acres. Of the total debt incurred during the 10 years, \$356,809,731, or 40.98 per cent, was on acre tracts and \$513,890,209, or 59.02 per cent, was on lots.

THE NUMBER OF MORTGAGES.

During the decade 612,249 mortgages stating amount of debt were made, and of these 255,420 mortgages, or 41.72 per cent of the total, were on acre tracts and 356,829 mortgages, or 58.28 per cent of the total, were on lots. In 1880, 42,783 mortgages were made. The number in 1889 was 86,161, and without exception there was an increase from year to year. The annual increase in the number of mortgages made on lots alone was also unbroken. The decade began with 18,520 mortgages on lots in 1880 and ended with 60,651 in 1889, an increase of 227.49 per cent. The mortgages made on acre tracts numbered 24,263 in 1880, and increased to 27,062 in 1882, since which time the annual number was less, the lowest being 24,005 in 1888. In 1889 the number of mortgages made on acre tracts was 25,510, an increase of 5.14 per cent over the number made in 1880 and a decrease of 5.73 per cent from the number made in 1882. The mortgages that do not state the amount of the debt that they secure are not included in any of the preceding totals nor in any other totals of this bulletin, unless otherwise specified. They are 0.69 of 1 per cent of the total number of mortgages stating and not stating amount of debt.

ACRES AND LOTS MORTGAGED IN 10 YEARS.

The acre tracts covered by mortgage during the 10 years represent a total of 21,578,919 acres, the annual number being 2,019,575 in 1880, increasing to 2,371,130 in 1881, and afterward, on the whole, decreasing to 1,961,026 in 1888, the lowest number for any one of the 10 years. In 1889 the number of acres covered by mortgage was 2,143,743, an increase of 6.15 per cent over the number covered in 1880 and a decrease of 9.59 per cent from the number covered in 1881. There is no exception to the yearly increase in the number of lots covered by mortgage; the total number for 1880 was 32,793; for 1889, 103,532, an increase of 215.71 per cent. The total number of lots covered by mortgage during the decade was 602,152. In all totals of acres and lots the number covered by mortgages not stating amount of debt is included.

The results for the state, expressed in Table 1, are largely influenced by those for Cook county, containing Chicago. This appears in the following state summary of this table for all counties except Cook, in connection with which the results for Cook county are presented.

SUMMARY OF NUMBER AND AMOUNT OF REAL ESTATE MORTGAGES MADE AND NUMBER OF ACRES AND LOTS COVERED, BY YEARS.

ILLINOIS (not including Cook county).

YEARS.	MORTGAGES STATING AMOUNT OF DEBT.						NUMBER OF ACRES MORTGAGED.			NUMBER OF LOTS MORTGAGED.	NUMBER OF MORTGAGES NOT STATING AMOUNT OF DEBT.

THE STATE OUTSIDE OF COOK COUNTY.—An examination of this table discloses the fact that the amount of indebtedness incurred on real estate in Illinois outside of Cook county was \$35,693,702 in 1880. The amount rose to \$48,240,764 in 1882, after which year the annual amount was about two to four million dollars less until 1889, when it was \$51,039,691. During the 10 years a total amount of \$446,462,827 was incurred, of which \$332,078,439, or 74.38 per cent, was on acre tracts and \$114,384,388, or 25.62 per cent, was on lots. The highest amount incurred on acres in any one year was \$36,942,224 in 1882, which had risen from \$28,636,414 in 1880 and which decreased to \$30,272,283 in 1888, from which year the amount increased to \$34,752,691 in 1889. A general gain from year to year is exhibited by the amount of incumbrance placed on lots, the total for 1880 being \$7,057,288, and the total for 1889, \$16,286,490. In the state outside of Cook county 413,132 mortgages were made, of which 251,504, or 60.88 per cent, were on acre tracts and 161,628, or 39.12 per cent, were on lots. It thus appears on analysis that the state summary of Table 1 is chiefly shaped by the mortgages made during the 10 years in Chicago.

COOK COUNTY.—The mortgaging of real estate in Cook county during the decade is represented by a total of 199,117 mortgages made to secure a debt of \$424,237,113. Of this amount \$399,505,821, or 94.17 per cent,

was on lots and \$2,473,292, or 5.83 per cent, was on acre tracts. There was a general yearly increase in the total amount from \$17,583,227 in 1880 to \$86,723,365 in 1889, the increase for the 10 years being 393.22 per cent. The amount of debt incurred on acre tracts in 1889 was \$6,052,198, an increase of 395.91 per cent over the \$1,220,423 incurred in 1880. The highest amount incurred during any year preceding 1889 was \$3,233,364 in 1887. Every year except 1883 and 1884 shows an increase in the amount of debt incurred on lots over that of the preceding year. The amount incurred in 1880 was \$16,362,804; in 1889, \$80,671,167, a gain of 393.02 per cent during the decade.

Of the total number of mortgages made on real estate in Cook county, 3,916, or 1.97 per cent, covered acre tracts and 195,201, or 98.03 per cent, covered lots. The total number increased annually from 8,413 in 1880 to 38,609 in 1889, or 358.92 per cent. The increase in the number of mortgages made on acres was from 354 in 1880 to 580 in 1889, or 63.84 per cent. The highest number for any year was in 1889, and the lowest number was 298, in 1885. Without exception there was an annual increase in the number of mortgages made on lots, the number for 1880 being 8,059, and for 1889 38,029, an increase of 371.88 per cent. During the 10 years 174,452 acres were incumbered in this county. The number for 1880 was 16,195; the highest number was 25,670 in 1889, and the lowest number was 14,871 in 1883. The number of lots incumbered by mortgage in 1880 was 14,107, and after an increase from year to year, 65,370 lots were incumbered in 1889, a gain of 363.39 per cent over 1880. These totals of acres and lots include the number covered by mortgages not stating amount of debt.

It is found that 48.72 per cent of the real estate mortgage indebtedness incurred in the whole state during the decade was incurred in Cook county. The percentage for acre tracts is 6.93, and for lots 77.74. This county contains 31.15 per cent of the state's population, and the estimated true value of the taxed real estate of the county is 45.24 per cent of that of the whole state. In each of the following 12 counties a real estate mortgage debt of over \$10,000,000 was incurred during the decade: Bureau, Champaign, Cook, Kane, LaSalle, McLean, Peoria, Saint Clair, Sangamon, Vermilion, Will, and Winnebago, the total amount being \$556,482,598, or 63.91 per cent of the total amount incurred in the whole state. These counties contain 47.77 per cent of the population of the state, and the estimated true value of their taxed real estate is 60.76 per cent of that of the entire state.

AVERAGES.—The average mortgage made during the decade in the state was for \$1,422; on acres, \$1,397; on lots, \$1,440. In the state, not including Cook county, the average real estate mortgage was for \$1,081; on acres, \$1,320; on lots, \$708. In Cook county the average real estate mortgage was for \$2,131; on acres, \$6,315; on lots, \$2,047. A mortgage on acres covered 84 acres on the average for the state for 10 years, and a mortgage on lots covered 1.68 lots. In the state, not including Cook county, a mortgage on acres covered 84 acres on the average and a mortgage on lots covered 1.71 lots. In Cook county 44 acres were covered on the average by a mortgage on acres, and 1.65 lots by a mortgage on lots. The average amount of incumbrance per mortgaged acre in the state during the 10 years was \$17; per mortgaged lot, \$858. In the state, not including Cook county, the average per mortgaged acre was \$16; per mortgaged lot, \$414. In Cook county the average amount of incumbrance per mortgaged acre was \$144; per mortgaged lot, \$1,238.

EXISTING INDEBTEDNESS.

The mortgage indebtedness in force against the real estate of Illinois January 1, 1890, was \$384,299,150, of which \$165,289,112, or 43.01 per cent, was on acre tracts and \$219,010,038, or 56.99 per cent, was on village and city lots. This is shown in Table 2. The chief portion of the state's debt on lots is found in Cook county, the amount being \$177,452,904, which is 81.03 per cent of total debt on lots. Cook county also has a larger debt on acres than any other county in the state, the amount being \$14,065,305, or 8.51 per cent of the total for the state. The total mortgage debt in Cook county is \$191,518,209, which is 49.84 per cent of the total amount in force against the real estate of the state. The population of this county increased 96.19 per cent from 1880 to 1890, and was 1,191,922 June 1, 1890. Its real estate mortgage debt is \$16,798,138 larger than the debt on acre tracts in Kansas, \$42,061,065 larger than the debt on acre tracts in Iowa, \$112,068,830 larger than the entire real estate mortgage debt of Alabama and Tennessee, \$8,255,962 less than the total of Iowa, and \$51,628,617 less than the total of Kansas, or 95.87 per cent of the Iowa debt and 78.77 per cent of the Kansas debt.

In addition to Cook county each of the following counties has an existing mortgage debt of over \$5,000,000: Kane, LaSalle, McLean, Peoria, Saint Clair, Sangamon, and Will. These 8 counties have 60.06 per cent of the debt of the state and 43.41 per cent of its population. In each of the following 7 counties there is a debt of between \$4,000,000 and \$5,000,000: Adams, Bureau, Champaign, Iroquois, Livingston, Vermilion, and Winnebago. The foregoing 15 of the state's 102 counties contain 51.32 per cent of its population, and owe 68.23 per cent of its real estate mortgage debt. The per capita debt in force in Illinois is \$100; in Cook county, \$161; in the state outside of Cook county, \$73. Mortgages have an average life of 4.015 years; on acres, 5.093 years; on lots, 3.373 years. In the state outside of Cook county the average life of a mortgage is 4.743 years; on acres, 5.103 years; on lots, 3.668 years. In Cook county an average mortgage lives 3.364 years; on acres,

4,901 years; on lots, 3,304 years. The percentage of partial payments made on mortgages in force in the whole state is 11.71. The percentage for acres is 9.46; the percentage for lots, 13.34. The existing debt incumbers 10,660,987 acres and 286,148 lots, and is represented by 128,986 mortgages in force against acres and 168,261 mortgages in force against lots; total number of mortgages in force, 297,247. An estimate of the true value of the taxed acres of the state makes it \$1,245,396,800; of the taxed lots, \$1,488,303,206; total, \$2,733,700,006, with the understanding that the assessed valuation is 27.76 per cent of the true value for acres and 15.97 per cent for lots, these percentages being averages for all the counties. There were 34,640,560 taxed acres and 1,094,737 taxed lots in 1890. The following results are derived:

Percentage of estimated true value of all taxed real estate represented by the debt in force	14.06
Percentage of estimated true value of all taxed acres represented by the debt in force against acres...	13.27
Percentage of estimated true value of all taxed lots represented by the debt in force against lots	14.72
Percentage of the total number of taxed acres represented by the number of mortgaged acres	30.78
Percentage of the total number of taxed lots represented by the number of mortgaged lots.....	26.14
Percentage of estimated true value of mortgaged acres represented by the debt in force against acres ..	43.13
Average amount of debt in force per assessed acre	\$4.77
Average amount of debt in force per mortgaged acre	\$15.50
Average value of each mortgaged acre	\$35.95
Average amount of debt in force per assessed lot	\$200
Average number of acres covered by each mortgage in force against acres	83
Average amount of debt to each mortgage in force.....	\$1,293
Average amount of debt to each mortgage in force against acres	\$1,281
Average amount of debt to each mortgage in force against lots.....	\$1,302
Average estimated true value of acre real estate covered by each mortgage in force against acres.....	\$2,971

In expressing an average value per acre it is to be understood that all improvements are included. As the most important derived result of this investigation in Illinois it may be stated that 30.78 per cent of the number of taxed acres in the state are mortgaged, and that the incumbrance is 43.13 per cent of the estimated true value of the mortgaged acres.

To what extent Cook county influences these results appears in the following statement for the state, not including Cook county:

Percentage of estimated true value of all taxed real estate represented by the debt in force	12.88
Percentage of estimated true value of all taxed acres represented by the debt in force against acres...	13.09
Percentage of estimated true value of all taxed lots represented by the debt in force against lots.....	12.17
Percentage of the total number of taxed acres represented by the number of mortgaged acres	30.96
Percentage of the total number of taxed lots represented by the number of mortgaged lots.....	19.77
Percentage of estimated true value of mortgaged acres represented by the debt in force against acres ..	42.27
Average amount of debt in force per assessed acre	\$4.43
Average amount of debt in force per mortgaged acre	\$14.30
Average value of each mortgaged acre	\$33.84
Average amount of debt in force per assessed lot.....	\$69
Average number of acres covered by each mortgage in force against acres	83
Average amount of debt to each mortgage in force.....	\$986
Average amount of debt to each mortgage in force against acres	\$1,192
Average amount of debt to each mortgage in force against lots.....	\$606
Average estimated true value of acre real estate covered by each mortgage in force against acres	\$2,820

Eliminating Cook county, the derived results for the remainder of the state show that 30.96 per cent of the taxed acres are mortgaged for 42.27 per cent of their true value.

INTEREST RATES AND CLASSIFIED AMOUNTS OF LOANS.

It is shown by Table 3 that the chief rate of interest on real estate mortgage loans in Illinois during the 10 years was 6 per cent, which rate was borne by 39.28 per cent of the amount of the loans; 27.53 per cent of the amount of the loans bore interest at 8 per cent; 26.93 per cent of the amount of the loans at 7 per cent, and 0.13 of 1 per cent of the amount of the loans at 10 per cent. The indebtedness incurred during the 10 years at rates less than 6 per cent is 4.87 per cent of the total indebtedness incurred during that time; 0.15 of 1 per cent of the total incurred indebtedness bore rates higher than 8 per cent, which were usurious, and 0.01 of 1 per cent of the total bore rates higher than 10 per cent. The highest rate found in this state is 18 per cent, and the total number of rates found is 44, not including loans at 0 per cent.

It appears in Table 4 that by far the largest class of mortgages is for amounts of \$500 and under \$1,000, the number of mortgages in this class being 23.38 per cent of the total number of mortgages recorded during the ten years. Next in size is the class of mortgages for \$1,000 and under \$1,500, the number of which is 14.24 per cent of the total. The number of mortgages in the five classes under \$500 is 35.90 per cent of the total, and the number of mortgages for \$10,000 and over is 1.23 per cent of the total.

SPECIAL INVESTIGATIONS.

In the counties of Bureau, Iroquois, Jasper, and Morgan special investigations were conducted, through personal inquiry among mortgagors, for the purpose of ascertaining the exact amount remaining unpaid on all mortgages found uncanceled of record January 1, 1890, and the object for which the original debt in each case was incurred. These counties are as well distributed throughout the state as so few counties can be. The common characteristic of all is that they are agricultural counties, and none of them contain any important manufacturing centers. They are all, also, among the older counties, though Iroquois presents some of the conditions of a new county, owing to the fact that much of the land has been redeemed and made arable in recent years by a general system of ditch and tile drainage.

Bureau county is a standard agricultural county of the better sort, organized in the year 1837, containing 35,014 inhabitants and 547,429 taxed acres. It is about 100 miles southwest of Chicago, and is traversed by two trunk railroads and their branches. The present owners and occupants of the soil are largely the descendants in the first or second degree of the pioneers who settled the county and prospered from the first fruits of the land and the opportunities offered by the development of trade and transportation.

When this county was selected for special investigation it was represented to the Census Office that its people, during the past decade, had been suffering from continued business depression; that, while crops and live stock were flourishing, it cost more to raise them than they were worth in the market; that land values had consequently declined; that the farmers had become poorer, indebtedness had increased, and that many farms had been mortgaged for money to defray the living expenses of their owners or had been sold at a sacrifice in order that the owners might remove to newer states.

This county has an existing debt of \$4,766,139, of which \$4,396,763, or 92.25 per cent of the total, is on acres and \$369,376, or 7.75 per cent of the total, is on lots. The population being 35,014, the per capita indebtedness is \$136 and the per family indebtedness \$656, and there are 12.31 persons, or 2.56 families, on the average to each mortgage in force. Partial payments represent 8.85 per cent of the original amount of the existing loans; on acres, 8.77 per cent; on lots, 9.77 per cent. 207,476 acres are covered by mortgage, and these are 37.90 per cent of the total number of taxed acres. 1,256 lots are mortgaged, or 15.43 per cent of the total number taxed, which is 8,138. The number of mortgages in force against acres is 2,005, or 70.47 per cent of the total; against lots, 840, or 29.53 per cent of the total number, 2,845. The average amount of debt to each mortgage is \$1,675; on acres, \$2,193; on lots, \$440. The average incumbrance on each mortgaged acre is \$21.19; on each mortgaged lot, \$294. There are 103 acres, on the average, incumbered by each mortgage on acres and 1.50 lots by each mortgage on lots.

Iroquois county is on the eastern boundary of the state, about 60 miles south of Chicago. It was organized in 1833, has a population of 35,167, and 703,314 taxed acres. There are no coal mines in the county nor important manufactories. It is reported of this county that agriculture has been profitable in recent years; that the value of land has materially increased; that the financial condition of the inhabitants has gradually improved, and that they never were more prosperous than January 1, 1890, which, it should be borne in mind, is the present time of this investigation.

In this county there is an existing real estate mortgage debt of \$4,368,311, of which \$4,139,470, or 94.76 per cent, is on acre tracts and \$228,841, or 5.24 per cent, is on lots. This makes a per capita debt of \$124 and a per family debt of \$610. The number of mortgages in force is 3,442; on acres, 2,932, or 85.18 per cent of the total; on lots, 510, or 14.82 per cent of the total, and there are 10.22 persons, or 2.08 families, on the average, to a mortgage in force. Of the total number of assessed acres, 293,381, or 41.71 per cent, are covered by mortgages, and of the 10,057 assessed lots, 1,054, or 10.48 per cent, are covered. There is a debt of \$14.11 to each mortgaged acre, on the average, and of \$217 to each mortgaged lot, while 100 acres are incumbered by each mortgage in force against acres, on the average, and 2.07 lots by a mortgage on lots. The average amount of debt per mortgage in force is \$1,269; on acres, \$1,412; on lots, \$449. The partial payments amount to 9.06 per cent of the original amount of the existing debt; on acres, 8.65 per cent; on lots, 15.81 per cent.

Jasper county is a small county in the southeastern part of the state, organized in 1831, and containing 18,188 inhabitants and 309,590 taxed acres. The soil is thin, with a clay subsoil, and will not sustain vegetation through a prolonged drought. Within the 10 years preceding the date of this investigation the county sustained two almost total crop failures, and in one case the farmers applied to the state for assistance. The people are for the most part poor, small farms are the rule, and there are many persons who hire land from year to year on which to work. Notwithstanding these adverse conditions, the population and material wealth of this county have considerably increased during the last decade.

Of the existing debt of \$500,271 in this county, \$457,478, or 91.45 per cent, is on acres and \$42,793, or 8.55 per cent, is on lots. 1,216 mortgages are in force, 1,031 of which, or 84.79 per cent, are on acres, and 185, or 15.21 per cent, are on lots. The average mortgage amounts to \$411; on acres, \$444; on lots, \$231.

Mortgages incumber 76,716 acres, or 24.78 per cent of the assessed acres of the county, and 238 lots, or 13.57 per cent of the county's 1,754 assessed lots. On each mortgaged acre, on the average, there is a debt of \$5.96, and there is a debt of \$180 on each mortgaged lot, while 74 acres, on the average, are covered by each mortgage on acres and 1.29 lots by each mortgage on lots. The per capita debt is \$28; per family debt, \$139; and there are 14.96 persons, or 2.96 families, on the average, to each existing mortgage. The original amount of the existing debt has been reduced to the extent of 10.44 per cent by partial payments; on acres, 8.59 per cent; on lots, 26.43 per cent.

Morgan county, in the western central part of the state, is a rich old county, organized in 1823, and now has a population of 32,636 and 353,352 taxed acres. It is reported from observation that wealth is pretty evenly distributed among the people of the county, and that the standard of living and of social and educational attainment is high. This county belongs to the better class of counties in central Illinois, and it is currently said of it that the financial condition of the people has been steadily improving during the last 10 years, and that general prosperity has especially characterized the more recent years of the decade.

The debt in force in this county amounts to \$2,663,633, 73.29 per cent of which, or \$1,952,163, is on acres and 26.71 per cent of which, or \$711,470, is on lots. This debt is represented by 1,946 mortgages, 1,067 of which, or 54.83 per cent, are on acres and 879, or 45.17 per cent, are on lots. The average mortgage stands for a debt of \$1,369; on acres, \$1,830; on lots, \$809. The 90,337 acres incumbered by the debt are 25.57 per cent of the taxed acres of the county, and the 1,303 incumbered lots are 22.82 per cent of the 5,710 taxed lots. Each mortgaged acre, on the average, secures a debt of \$21.61, and each mortgaged lot \$546. 85 acres are covered by the average mortgage on acres and 1.48 lots by the average mortgage on lots. There is a per capita debt of \$82 and a per family debt of \$412, and there are 16.77 persons, or 3.32 families, on the average, to an existing mortgage. Partial payments amount to 15.30 per cent of the original amount of the debt in force; on acres, 11.19 per cent; on lots, 24.85 per cent.

The securing of purchase money, or deferred payments, was the leading object of the indebtedness in these 4 counties; 62.16 per cent of the original amount of the debt in force in Bureau county was incurred for this object when not combined with any other object, 79.71 per cent in Iroquois county, 52.66 per cent in Jasper county, and 60.03 per cent in Morgan county. The cost of real estate improvements, combined with no other object, represents 6.13 per cent of the face of the existing mortgages in Bureau county, 8.73 per cent in Iroquois county, 10.58 per cent in Jasper county, and 17.23 per cent in Morgan county. Purchase money and improvements, singly or in combination with each other, and business in combination with no other object, are objects of 82.92 per cent of the face of existing mortgages in Bureau county, 94.72 per cent in Iroquois county, 75.79 per cent in Jasper county, and 89.19 per cent in Morgan county.

Most of the preceding results of special investigation in the 4 Illinois counties are taken from tables that are too long to be presented in a bulletin. A presentation of the objects of indebtedness, however, will be found in Table 5.

TABLE 1.—ILLINOIS.—SUMMARY OF NUMBER AND AMOUNT OF REAL ESTATE MORTGAGES MADE AND NUMBER OF ACRES AND LOTS COVERED, BY YEARS.

[These mortgages do not represent the total debt in force, because many have been paid.]
